Lifecycle rules

Use lifecycle rules to define actions you want Amazon S3 to take during an object's lifetime such as transitioning objects to another storage class, archiving them, or deleting them after a specified period of time. [Learn more](#)

Actions

Create replication rule

Use replication rules to define options you want Amazon S3 to apply during replication such as server-side encryption, replica ownership, transitioning replicas to another storage class, and more. Replication also includes any annotations attached to your objects. [Learn more](#)

Replication now includes replicating any annotations attached to your objects, which might increase your costs. To understand the potential cost impact, review your replication rules and annotations usage.

Replication rule name	Status	Destination bucket	Destination Region	Priority	Scope	Storage class	Replica owner	Replication Time Control
☐ CRR	Enabled	s3://s3-devi-replicate-here-01	Asia Pacific (Hyderabad) ap-south-2	0	Entire bucket	Same as source	Same as source	Disabled
