

Amazon S3 Storage Classes - Hands-On

Selecting, verifying, and changing an object's storage class

Step 1: Selecting an Amazon S3 Storage Class

During object upload, S3 Standard-IA was selected. The screen also displays the available S3 storage classes and their key characteristics.

Upload

	Storage class	Designed for	Bucket type	Availability Zones	Min storage duration	Min billable object size	Monitoring and auto-tiering fees	Retrieval fees
☐	Standard	Frequently accessed data (more than once a month) with milliseconds access	General purpose	≥ 3	-	-	-	-
☐	Intelligent-Tiering	Data with changing or unknown access patterns	General purpose	≥ 3	-	-	Per-object fees apply for objects ≥ 128 KB	-
☒	Standard-IA	Infrequently accessed data (once a month) with milliseconds access	General purpose	≥ 3	30 days	128 KB	-	Per-GB fees apply
☐	One Zone-IA	Recreateable, infrequently accessed data (once a month) with milliseconds access	General purpose or directory	1	30 days	128 KB	-	Per-GB fees apply
☐	Glacier Instant Retrieval	Long-lived archive data accessed once a quarter with instant retrieval in milliseconds	General purpose	≥ 3	90 days	128 KB	-	Per-GB fees apply
☐	Glacier Flexible Retrieval (formerly Glacier)	Long-lived archive data accessed once a year with retrieval of minutes to hours	General purpose	≥ 3	90 days	-	-	Per-GB fees apply
☐	Glacier Deep Archive	Long-lived archive data accessed less than once a year with retrieval of hours	General purpose	≥ 3	180 days	-	-	Per-GB fees apply
☐	Reduced redundancy	Noncritical, frequently accessed data with milliseconds access (not recommended as S3 Standard is more cost effective)	General purpose	≥ 3	-	-	-	Per-GB fees apply

Step 2: Object Uploaded Successfully

The coffee.jpg object was uploaded successfully to the S3 bucket.

The screenshot displays the AWS Management Console interface for the 'ap-south-1' region. At the top, a green notification bar indicates 'Upload succeeded' with a link to the 'Files and folders table'. Below this, the 'Upload: status' section shows a summary of the upload process. The 'Destination' is 's3://s3-storage-class-devi-demo-01'. The 'Succeeded' status shows '1 file, 108.4 KB (100.00%)', while the 'Failed' status shows '0 files, 0 B (0%)'. The 'Files and folders' tab is active, displaying a table with one entry: 'coffee.jpg' (image/jpeg, 108.4 KB, Succeeded). The footer contains links for CloudShell, Feedback, Console Mobile App, and copyright information for Amazon Web Services, Inc. or its affiliates.

Step 3: Verifying the Initial Storage Class

The object list confirms that coffee.jpg was stored using the S3 Standard-IA storage class.

The screenshot displays the AWS Management Console interface for the bucket 's3-storage-class-devi-demo-01'. The 'Objects' tab is selected, showing a list of objects. The object 'coffee.jpg' is listed with a size of 108.4 KB and is stored in the 'Standard-IA' storage class. The console also shows various action buttons like 'Copy S3 URI', 'Copy URL', 'Download', 'Open', 'Delete', 'Actions', 'Create folder', and 'Upload'.

Step 4: Verifying the Updated Storage Class

The object's storage class was changed from S3 Standard-IA to S3 Intelligent-Tiering, and the updated value is visible in the object list.

The screenshot shows the AWS Management Console interface for the bucket 's3-storage-class-devi-demo-01'. The 'Objects' tab is active, displaying a table of objects. The table has columns for Name, Type, Last modified, Size, and Storage class. One object, 'coffee.jpg', is listed with a storage class of 'Intelligent-Tiering'. A black callout box at the bottom of the console area contains the text: 'Storage class changed from Standard-IA to intelligent-Tiering'.

Name	Type	Last modified	Size	Storage class
coffee.jpg	jpg	July 12, 2026, 11:22:05 (UTC+05:30)	108.4 KB	Intelligent-Tiering
